This is the third in an annual series of bibliographies listing selected dissertations drawn from the pages of Dissertation Abstracts (D.A.) [see also Hays 1983, Laferrière 1984]. All three listings were made by scanning the titles and abstracts published in D.A. and making a subjective decision as to which ones might be relevant to work in ethnobiology or related disciplines such as ecological anthropology. Dissertations categorized in D.A. under Anthropology, American Studies, Linguistics, Language, Sociology, Ecology, Biology, Botany, Zoology, and Agriculture were considered for inclusion in the list. An attempt was made to be as inclusive as possible, but some other dissertations may have been overlooked. The compiler would be grateful for comments and suggestions as to dissertations which might be worthy of inclusion in next year's edition.

The dissertations are listed alphabetically below, along with the year of acceptance, title, institution, length, advisor or major professor, number of the page in D.A. in which the abstract may be found, University Microfilms order number, and the ISBN number, when this information was given.

Most of the dissertations accepted at institutions in the United States may be obtained from University Microfilm International, P.O. Box 1764, Ann Arbor, MI 48106, either on microfilm or published by microfilm xerography. Current prices may be obtained by calling 313-761-4700 or 800-521-3042 [in Canada, 800-268-6090].

Canadian and European dissertations are not now available through UMI, although this may change in the future. Relatively few European universities participate in the D.A. abstracting service; hence those European dissertations listed represent a small proportion of the total. Abstracts of all the dissertations listed below are, however, published in English in Dissertation Abstracts.
